For the 2000 version, the Swedish Register of Education underwent extensive quality improvements which led to a break in the time series and this means that comparisons with previous versions of the register must be done very carefully! -1) SUN, the Swedish Educational Terminology, was adapted to the international terminology ISCED 97 (International Standard Classification of Education) with the new SUN 2000. -2) A number of new data sources were added to the register. The most important new sources were: -*Total higher education points from 1993 from the Higher Education Register* -*Total KOMVUX (adult education) points from 1988* -*Foreign educational programmes which are recognised by the National Agency for Higher Education* -*The National Board of Health's register of healthcare and medical staff*.

Note that educational data might be incomplete for a small number of persons. It could concern people with degrees from abroad or with private degrees or with internal company-educations or people with old degrees.

level of education: The classification by level of educational attainment is according to the Swedish national educational classification (SUN)
