Source: Statistics Iceland Labour force survey.

Changes were made in the collection of information about educational attainment in 2021, so that respondents were asked to confirm if the information available on their education was correct or not.

The relative standard error is over 20% for numbers under 1,000.

All numbers are rounded to the next hundred when greater than 50. Due to rounding, figures may not add up to totals and subtotals.

The data are classified according to the international classification of education ISCED 2011.

Latest update: 20240730 09:00

Units: Number

Reference period: 2003-2023
