B23001: SEX BY AGE BY EMPLOYMENT STATUS FOR THE POPULATION 16 YEARS AND OVER Universe: Population 16 years and over 2023 American Community Survey, 1-Year Estimates Detailed Tables

	Alaska	
	Estimate	Margin of Error
Total:	577,598	±2,016
Male:	304,035	±2,102
16 to 19 years:	19,108	±3,287
In labor force:	8,959	±3,229
In Armed Forces	490	$\pm 3,848$
Civilian:	8,469	±1,920
Employed	6,981	$\pm 1,698$
Unemployed	1,488	± 656
Not in labor force	10,149	±1,726
20 and 21 years:	11,950	±2,339
In labor force:	10,229	±2,264
In Armed Forces	3,534	±1,285
Civilian:	6,695	±1,786
Employed	6,296	$\pm 1,761$
Unemployed	399	±297
Not in labor force	1,721	±549
22 to 24 years:	16,458	±3,702
In labor force:	14,851	±3,592
In Armed Forces	3,667	$\pm 1,688$
Civilian:	11,184	±2,475
Employed	10,508	±2,649
Unemployed	676	± 465
Not in labor force	1,607	±555
25 to 29 years:	29,917	±1,813
In labor force:	26,573	$\pm 1,780$
In Armed Forces	4,346	±1,289
Civilian:	22,227	±2,253
Employed	20,761	±2,152
Unemployed	1,466	±566
Not in labor force	3,344	± 628
30 to 34 years:	28,745	$\pm 1,448$
In labor force:	24,960	$\pm 1,680$
In Armed Forces	2,436	±907
Civilian:	22,524	±1,778
Employed	21,704	$\pm 1,809$
Unemployed	820	±497
Not in labor force	3,785	±1,006
35 to 44 years:	58,247	±1,882
In labor force:	49,764	±2,210
In Armed Forces	3,707	±1,099
Civilian:	46,057	±2,395
Employed	44,565	$\pm 2,468$
Unemployed	1,492	±532
Not in labor force	8,483	±1,511
45 to 54 years:	44,104	$\pm 1,895$
In labor force:	38,012	±1,937
In Armed Forces	1,393	±786
Civilian:	36,619	±1,933
Employed	34,528	±1,938
Unemployed	2,091	±861
Not in labor force	6,092	±1,036
55 to 59 years:	20,716	±1,565
In labor force:	15,831	±1,620
In Armed Forces	29	± 48

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, the decennial census is the official source of population totals for April 1st of each decennial year. In between censuses, the Census Bureau's Population Estimates Program produces and disseminates the official estimates of the population for the nation, states, counties, cities, and towns and estimates of housing units and the group quarters population for states and counties.

Information about the American Community Survey (ACS) can be found on the ACS website. Supporting documentation including code lists, subject definitions, data accuracy, and statistical testing, and a full list of ACS tables and table shells (without estimates) can be found on the Technical Documentation section of the ACS website.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Source: U.S. Census Bureau, 2023 American Community Survey 1-Year Estimates

ACS data generally reflect the geographic boundaries of legal and statistical areas as of January 1 of the estimate year. For more information, see Geography Boundaries by Year.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see ACS Technical Documentation). The effect of nonsampling error is not represented in these tables.

Users must consider potential differences in geographic boundaries, questionnaire content or coding, or other methodological issues when comparing ACS data from different years. Statistically significant differences shown in ACS Comparison Profiles, or in data users' own analysis, may be the result of these differences and thus might not necessarily reflect changes to the social, economic, housing, or demographic characteristics being compared. For more information, see Comparing ACS Data.

Employment and unemployment estimates may vary from the official labor force data released by the Bureau of Labor Statistics because of differences in survey design and data collection. For guidance on differences in employment and unemployment estimates from different sources go to Labor Force Guidance.

Armed Forces data are not shown for the population 65 years and over.

Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on 2020 Census data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

- The estimate could not be computed because there were an insufficient number of sample observations. For a ratio of medians estimate, one or both of the median estimates falls in the lowest interval or highest interval of an open-ended distribution. For a 5-year median estimate, the margin of error associated with a median was larger than the median itself.

N The estimate or margin of error cannot be displayed because there were an insufficient number of sample cases in the selected geographic area. (X) The estimate or margin of error is not applicable or not available.

median- The median falls in the lowest interval of an open-ended distribution (for example "2,500-")

median+ The median falls in the highest interval of an open-ended distribution (for example "250,000+").

** The margin of error could not be computed because there were an insufficient number of sample observations.

*** The margin of error could not be computed because the median falls in the lowest interval or highest interval of an open-ended distribution.

***** A margin of error is not appropriate because the corresponding estimate is controlled to an independent population or housing estimate. Effectively, the corresponding estimate has no sampling error and the margin of error may be treated as zero.
