## S2413: INDUSTRY BY SEX AND MEDIAN EARNINGS IN THE PAST 12 MONTHS (IN 2023 INFLATION-ADJUSTED DOLLARS) FOR THE CIVILIAN EMPLOYED POPULATION 16 YEARS AND OVER

## Universe: None

2023 American Community Survey, 1-Year Estimates Subject Tables

	Alaska							
	Median earnings (dollars)		Median earnings (dollars) for male		Median earnings (dollars) for female		Women's earnings as a percentage of men's	
	Estimate	Margin of Error	Estimate	Margin of Error	Estimate	Margin of Error	Estimate	Margin of Error
Civilian employed population 16 years and over with earnings	51,256	±908	60.264	$\pm 2.834$	45.228	±1.625	75.0%	±4.9
Agriculture, forestry, fishing and hunting, and mining:	100,845	±15,504	105,526	±13,436	36,383	±41,646	34.5%	±39.4
Agriculture, forestry, fishing and hunting	27,583	±9,278	30,665	±10,140	22,134	±6,268	72.2%	±37.3
Mining, quarrying, and oil and gas extraction	131,250	±10,829	129,036	±12,065	156,239	±51,705	121.1%	±41.9
Construction	60,882	±5,201	59,250	±6,103	73,948	±14,647	124.8%	±27.7
Manufacturing	44,924	±6,015	51,883	±10,844	42,683	±5,634	82.3%	±18.4
Wholesale trade	55,776	±9,036	58,215	±5,053	38,955	±2,136	66.9%	±6.8
Retail trade	32,987	±3,195	36,808	±1,820	29,719	±3,548	80.7%	±10.2
Transportation and warehousing, and utilities:	63,727	±5,117	70,829	±4,337	45,575	±9,272	64.3%	±13.3
Transportation and warehousing	61,824	$\pm 5,005$	67,568	±7,377	45,556	±9,404	67.4%	±14.8
Utilities	76,352	±9,227	78,843	±23,283	65,132	$\pm 85,848$	82.6%	±110.4
Information	56,228	±19,118	55,531	±18,246	71,685	$\pm 50,945$	129.1%	±97.4
Finance and insurance, and real estate and rental and leasing:	60,291	±8,267	62,401	±24,491	59,795	$\pm 9,859$	95.8%	±46.1
Finance and insurance	61,663	$\pm 5,548$	83,971	$\pm 57,855$	60,040	±13,091	71.5%	±42.9
Real estate and rental and leasing	51,235	$\pm 13,564$	39,966	±20,103	59,477	±32,648	148.8%	±102.8
Professional, scientific, and management, and administrative and waste management services:	56,494	±7,491	68,244	±15,813	49,770	±8,021	72.9%	±19.5
Professional, scientific, and technical services	67,406	±9,682	97,352	±25,286	58,261	±9,623	59.8%	±17.2
Management of companies and enterprises	167,819	$\pm 56,362$	168,152	$\pm 56,839$	-	**	-	**
Administrative and support and waste management services	39,498	$\pm 3,470$	41,099	$\pm 8,990$	38,376	±11,437	93.4%	±33.6
Educational services, and health care and social assistance:	53,567	±4,473	60,225	$\pm 7,746$	51,353	±3,259	85.3%	±13.4
Educational services	53,011	$\pm 9,560$	65,649	$\pm 7,361$	46,809	$\pm 6,949$	71.3%	±14.5
Health care and social assistance	53,742	$\pm 4,560$	55,962	$\pm 8,875$	52,848	$\pm 4,568$	94.4%	±18.2
Arts, entertainment, and recreation, and accommodation and food services:	26,476	±4,387	31,129	±6,317	22,708	±3,431	72.9%	$\pm 18.8$
Arts, entertainment, and recreation	38,058	$\pm 19,157$	45,987	$\pm 5,633$	20,579	$\pm 29,283$	44.7%	±65.2
Accommodation and food services	25,317	$\pm 3,687$	28,742	±5,125	23,021	$\pm 2,979$	80.1%	±17.9
Other services, except public administration	47,997	$\pm 3,465$	63,355	±25,615	42,615	$\pm 10,735$	67.3%	$\pm 33.8$
Public administration	65,042	$\pm 5,372$	70,858	$\pm 7,006$	60,162	$\pm 8,464$	84.9%	$\pm 14.8$

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, the decennial census is the official source of population totals for April 1st of each decennial year. In between censuses, the Census Bureau's Population Estimates Program produces and disseminates the official estimates of the population for the nation, states, counties, cities, and towns and estimates of housing units and the group quarters population for states and counties.

Information about the American Community Survey (ACS) can be found on the ACS website. Supporting documentation including code lists, subject definitions, data accuracy, and statistical testing, and a full list of ACS tables and table shells (without estimates) can be found on the Technical Documentation of the ACS website.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

ACS data generally reflect the geographic boundaries of legal and statistical areas as of January 1 of the estimate year. For more information, see Geography Boundaries by Year.

Users must consider potential differences in geographic boundaries, questionnaire content or coding, or other methodological issues when comparing ACS data from different years. Statistically significant differences shown in ACS Comparison Profiles, or in data users' own analysis, may be the result of these differences and thus might not necessarily reflect changes to the social, economic, housing, or demographic characteristics being compared. For more information, see Comparing ACS Data.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see ACS Technical Documentation). The effect of nonsampling error is not represented in these tables.

Industry titles and their 4-digit codes are based on the 2022 North American Industry Classification System. The Industry categories adhere to the guidelines issued in Clarification Memorandum No. 2, "NAICS Alternate Aggregation Structure for Use By U.S. Statistical Agencies," issued by the Office of Management and Budget.

Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on 2020 Census data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

- The estimate could not be computed because there were an insufficient number of sample observations. For a ratio of medians estimate, one or both of the median estimates falls in the lowest interval or highest interval of an open-ended distribution. For a 5-year median estimate, the margin of error associated with a median was larger than the median itself.

N The estimate or margin of error cannot be displayed because there were an insufficient number of sample cases in the selected geographic area.

(X) The estimate or margin of error is not applicable or not available.

median- The median falls in the lowest interval of an open-ended distribution (for example "2,500-")

median+ The median falls in the highest interval of an open-ended distribution (for example "250,000+").

\*\* The margin of error could not be computed because there were an insufficient number of sample observations.

\*\*\* The margin of error could not be computed because the median falls in the lowest interval or highest interval of an open-ended distribution.

\*\*\*\*\* A margin of error is not appropriate because the corresponding estimate is controlled to an independent population or housing estimate. Effectively, the corresponding estimate has no sampling error and the margin of error may be treated as zero.
