	men	384	39	85	116	107	28	9	334	30	59	112	87	37	9
	women	341	38	77	66	111	40	5	319	30	57	39	121	53	18

From the reference year 2025 onwards, a small controlled random uncertainty is introduced in all reported data. The uncertainty has been added to protect individuals so that no one risks being exposed in the statistics. As a result, the reported totals are not always equal to the sum of their reported components.

If reported statistical values are added together to create a new total, the uncertainty is also added. There is therefore a risk that the new total contains greater uncertainty than that which – under the method – would have been added to a single value.

The method used for disclosure control is called Cell Key Method (CKM). You can read more about the method here: [Protection methods for disclosure control](<https://www.scb.se/en/documentation/statistical-methods/protection-methods-for-disclosure-control/>) and here: [Development of disclosure protection](<https://www.scb.se/en/documentation/statistical-areas-under-change/development-of-disclosure-protection/>).

age: Age refers to age attained by the end of the year, i.e. in principal, an account for the year of birth.
