

Partnership Dec. 31 by year, region, marital status and sex, 2025

	Västerbotten county												Norrbotten county											
	total, all partnerships			registered partners			seperated partners			surviving partners			total, all partnerships			registered partners			seperated partners			surviving partners		
	total	men	women	total	men	women	total	men	women	total	men	women	total	men	women	total	men	women	total	men	women	total	men	women
2025	52	6	43	21	0	20	28	4	26	3	3	3	42	19	24	20	6	10	21	9	13	3	3	0

From the reference year 2025 onwards, a small controlled random uncertainty is introduced in all reported data. The uncertainty has been added to protect individuals so that no one risks being exposed in the statistics. As a result, the reported totals are not always equal to the sum of their reported components.

If reported statistical values are added together to create a new total, the uncertainty is also added. There is therefore a risk that the new total contains greater uncertainty than that which – under the method – would have been added to a single value.

The method used for disclosure control is called Cell Key Method (CKM). You can read more about the method here: [Protection methods for disclosure control](https://www.scb.se/en/documentation/statistical-methods/protection-methods-for-disclosure-control/) and here: [Development of disclosure protection](https://www.scb.se/en/documentation/statistical-areas-under-change/development-of-disclosure-protection/).

The table shows the number of persons by legal marital status.

The tables show the conditions on December 31st for each respective year according to administrative subdivisions of January 1st of the following year.
