	Percentage of all persons	2025	100,0	23,4	32,2	15,0	17,9	7,1	2,3	1,9	0,2

"From the reference year 2025 onwards, a small controlled random uncertainty is introduced in all reported data. The uncertainty has been added to protect individuals so that no one risks being exposed in the statistics. As a result, the reported totals are not always equal to the sum of their reported components. If reported statistical values are added together to create a new total, the uncertainty is also added. There is therefore a risk that the new total contains greater uncertainty than that which – under the method – would have been added to a single value.

The method used for disclosure control is called Cell Key Method (CKM). You can read more about the method here: [Protection methods for disclosure control](<https://www.scb.se/en/documentation/statistical-methods/protection-methods-for-disclosure-control/>) and here: [Development of disclosure protection](<https://www.scb.se/en/documentation/statistical-areas-under-change/development-of-disclosure-protection/>).

.. = Means that information is not available, too uncertain to be presented or removed for reasons of confidentiality.

observations:

Number of households: For people with no link to their dwelling (No information), household cannot be created.

Percentage of all households: For people with no link to their dwelling (No information), household cannot be created.
