

## Migration by year, observations, region, age, region of birth and sex, 2025

	all regions of birth			Västerbotten county born in Sweden			Foreign-born		
	total	men	women	total	men	women	total	men	women
	2025								
All in-migrations	9575	4714	4861	5981	2901	3077	3592	1810	1787
All out-migrations	11401	6102	5300	6094	3012	3083	5308	3092	2214
In-migrations from other municipalities within the county	0	0	0	0	0	0	0	0	0
In-migrations from other counties in Sweden	7430	3686	3742	5789	2810	2982	1641	879	758
Out-migrations to other municipalities within the county	0	0	0	0	0	0	0	0	0
Out-migrations to other counties in Sweden	9293	4861	4431	5697	2816	2880	3596	2046	1550
Immigrations	2146	1023	1121	190	95	95	1958	932	1025
Emigrations	2108	1238	870	394	192	202	1713	1043	669
Excess of migration	-1826	-1388	-439	-113	-111	-6	-1716	-1282	-427
Net migration within county	0	0	0	0	0	0	0	0	0
Net migration other counties	-1863	-1175	-689	92	-6	102	-1955	-1167	-792
Excess of immigration	38	-215	251	-204	-97	-107	245	-111	356

From the reference year 2025 onwards, a small controlled random uncertainty is introduced in all reported data. The uncertainty has been added to protect individuals so that no one risks being exposed in the statistics. As a result, the reported totals are not always equal to the sum of their reported components.

If reported statistical values are added together to create a new total, the uncertainty is also added. There is therefore a risk that the new total contains greater uncertainty than that which – under the method – would have been added to a single value.

The method used for disclosure control is called Cell Key Method (CKM). You can read more about the method here: [Protection methods for disclosure control](<https://www.scb.se/en/documentation/statistical-methods/protection-methods-for-disclosure-control/>) and here: [Development of disclosure protection](<https://www.scb.se/en/documentation/statistical-areas-under-change/development-of-disclosure-protection/>).

Age refers to age attained by the end of the year, i.e. in principal, an account for the year of birth.

observations:

Excess of migration: Excess of migration is the difference between the number of immigration and outmigration.

Excess of immigration: Excess of immigration is the difference between the number of immigration from abroad (immigrants) and outmigration to abroad (emigrants).
