

## Migration by year, observations, region, age, region of birth and sex, 2025

		all regions of birth			Norrbotten county born in Sweden			Foreign-born		
		total	men	women	total	men	women	total	men	women
		2025	All in-migrations	8185	4620	3563	4133	2205	1930	4050
	All out-migrations	6717	3655	3060	4506	2370	2133	2208	1284	926
	In-migrations from other municipalities within the county	0	0	0	0	0	0	0	0	0
	In-migrations from other counties in Sweden	5496	3018	2478	3933	2093	1842	1564	927	639
	Out-migrations to other municipalities within the county	0	0	0	0	0	0	0	0	0
	Out-migrations to other counties in Sweden	5686	3021	2664	4188	2183	2003	1497	836	660
	Immigrations	2688	1601	1086	202	110	90	2484	1491	997
	Emigrations	1031	637	396	318	189	131	714	449	264
	Excess of migration	1468	965	503	-373	-165	-203	1842	1133	709
	Net migration within county	0	0	0	0	0	0	0	0	0
	Net migration other counties	-190	-3	-186	-255	-90	-161	67	91	-21
	Excess of immigration	1657	964	690	-116	-79	-41	1770	1042	733

From the reference year 2025 onwards, a small controlled random uncertainty is introduced in all reported data. The uncertainty has been added to protect individuals so that no one risks being exposed in the statistics. As a result, the reported totals are not always equal to the sum of their reported components.

If reported statistical values are added together to create a new total, the uncertainty is also added. There is therefore a risk that the new total contains greater uncertainty than that which – under the method – would have been added to a single value.

The method used for disclosure control is called Cell Key Method (CKM). You can read more about the method here: [Protection methods for disclosure control](<https://www.scb.se/en/documentation/statistical-methods/protection-methods-for-disclosure-control/>) and here: [Development of disclosure protection](<https://www.scb.se/en/documentation/statistical-areas-under-change/development-of-disclosure-protection/>).

Age refers to age attained by the end of the year, i.e. in principal, an account for the year of birth.

observations:

Excess of migration: Excess of migration is the difference between the number of immigration and outmigration.

Excess of immigration: Excess of immigration is the difference between the number of immigration from abroad (immigrants) and outmigration to abroad (emigrants).
