

## Immigrations by year, country of birth, region and sex, 2025

	Västerbotten county			Norrbotten county		
	total	men	women	total	men	women
2025 all regions of birth incl. Sweden	2146	1023	1121	2688	1601	1086
Sweden	190	95	95	202	110	90
The Nordic countries, excluding Sweden	160	78	83	205	108	98
EU excl. the Nordic countries	487	251	238	684	463	219
Europe excl. EU and the Nordic countries	256	123	138	620	445	176
Africa	266	129	139	278	144	134
Asia	663	294	370	509	229	283
North and South America, Oceania, Soviet Union	124	62	60	185	105	85
unknown region of birth	0	0	0	3	0	3

From the reference year 2025 onwards, a small controlled random uncertainty is introduced in all reported data. The uncertainty has been added to protect individuals so that no one risks being exposed in the statistics. As a result, the reported totals are not always equal to the sum of their reported components. If reported statistical values are added together to create a new total, the uncertainty is also added. There is therefore a risk that the new total contains greater uncertainty than that which – under the method – would have been added to a single value.

The method used for disclosure control is called Cell Key Method (CKM). You can read more about the method here: [Protection methods for disclosure control](<https://www.scb.se/en/documentation/statistical-methods/protection-methods-for-disclosure-control/>) and here: [Development of disclosure protection](<https://www.scb.se/en/documentation/statistical-areas-under-change/development-of-disclosure-protection/>).

At the national level, immigration is reported for individual countries of birth. At the county and municipal level, only immigration from individual countries with at least 1,000 immigrations is reported. Countries with fewer than 1,000 people are reported in the group other countries of birth.
