	Alaska	
	Estimate	Margin of Error
Total:	302,307	+/-5,308
Male:	161,389	+/-3,342
Private for-profit wage and salary workers:	95,946	+/-3,381
Employee of private company workers	88,967	+/-3,401
Self-employed in own incorporated business workers	6,979	+/-1,439
Private not-for-profit wage and salary workers	11,668	+/-1,507
Local government workers	11,568	+/-1,347
State government workers	11,364	+/-1,486
Federal government workers	15,772	+/-2,043
Self-employed in own not incorporated business workers	14,767	+/-1,816
Unpaid family workers	304	+/-231
Female:	140,918	+/-3,433
Private for-profit wage and salary workers:	70,479	+/-3,499
Employee of private company workers	67,278	+/-3,447
Self-employed in own incorporated business workers	3,201	+/-801
Private not-for-profit wage and salary workers	18,963	+/-1,812
Local government workers	17,316	+/-1,823
State government workers	14,959	+/-1,300
Federal government workers	7,993	+/-1,090
Self-employed in own not incorporated business workers	10,694	+/-1,475
Unpaid family workers	514	+/-299

Source: U.S. Census Bureau, 2005 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

Explanation of Symbols:

1. An '*' entry in the margin of error column indicates that too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '***' entry in the margin of error column indicates that no sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
