B11010. NONFAMILY HOUSEHOLDS BY SEX OF HOUSEHOLDER BY LIVING ALONE BY AGE OF HOUSEHOLDER - Universe: NONFAMILY HOUSEHOLDS
Data Set: 2004 American Community Survey
Survey: American Community Survey

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey Methodology.

« hide upper and lower bounds

| | Alaska | | |
	Estimate	Lower Bound	Upper Bound
Total:	72,049	68,803	75,295
Male householder:	42,035	38,637	45,433
Living alone:	29,448	27,205	31,691
Householder 15 to 64 years	25,725	23,521	27,929
Householder 65 years and over	3,723	2,949	4,497
Not living alone:	12,587	10,435	14,739
Householder 15 to 64 years	12,432	10,294	14,570
Householder 65 years and over	155	0	322
Female householder:	30,014	27,229	32,799
Living alone:	23,251	21,092	25,410
Householder 15 to 64 years	17,150	15,429	18,871
Householder 65 years and over	6,101	5,052	7,150
Not living alone:	6,763	5,222	8,304
Householder 15 to 64 years	6,170	4,865	7,475
Householder 65 years and over	593	212	974

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a confidence interval. The interval shown here is a 90 percent confidence interval. The stated range can be interpreted roughly as providing a 90 percent probability that the interval defined by the lower and upper bounds contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The number of householders does not necessarily equal the number of households because of differences in the weighting schemes for the population and occupied housing units.

Explanation of Symbols:
1. An '*' entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
2. An '**' entry in the lower and upper bound columns indicates that no sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '***' entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '*****' entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
