

[B11012. HOUSEHOLD TYPE BY TENURE - Universe: HOUSEHOLDS](#)

Data Set: [2004 American Community Survey](#)

Survey: American Community Survey

NOTE: Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

[« hide upper and lower bounds](#)

	Alaska		
	Estimate	Lower Bound	Upper Bound
Total:	228,358	225,330	231,386
Family households:	156,309	152,873	159,745
Married-couple family:	119,212	115,106	123,318
Owner-occupied housing units	93,058	88,334	97,782
Renter-occupied housing units	26,154	24,038	28,270
Other family:	37,097	34,180	40,014
Male householder, no wife present:	13,428	11,630	15,226
Owner-occupied housing units	8,595	7,404	9,786
Renter-occupied housing units	4,833	3,686	5,980
Female householder, no husband present:	23,669	21,573	25,765
Owner-occupied housing units	11,838	10,482	13,194
Renter-occupied housing units	11,831	10,241	13,421
Nonfamily households:	72,049	68,803	75,295
Owner-occupied housing units	36,178	34,064	38,292
Renter-occupied housing units	35,871	33,001	38,741

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a confidence interval. The interval shown here is a 90 percent confidence interval. The stated range can be interpreted roughly as providing a 90 percent probability that the interval defined by the lower and upper bounds contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

The number of householders does not necessarily equal the number of households because of differences in the weighting schemes for the population and occupied housing units.

Explanation of Symbols:

1. An '*' entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
2. An '**' entry in the lower and upper bound columns indicates that no sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '***' entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '*****' entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
