The statistics use the regional division of 1 January 2014.

Instructions for creating a map by municipality.

Paint only the municipalities from Akaa to Äänekoski from the list

In the second list, select, for instance, Degree of urbanisation

Click Continue

From the Graphs and maps drop-down menu select map and the application opens a new window

The colour and size of the map can be adjusted. If the size of the map is 200% or more, the names of the areas will be printed on the map.

The map and legend are created as separate gif files and they can be saved with the right mouse button.
